Profiting From Load Curtailments: Hardware, Software, and Incentives

Wednesday, Jan. 17, 2001

10:00 AM - 11:30 AM

(followed by members-only briefing,
11:45 AM - 12:30 PM)

Load growth and transmission constraints are combining to raise the on-peak price of our power, especially during the summer. New options are appearing to respond to calls to reduce load at such times.

Learn about Con Ed's new load curtailment rate that pays you plenty when you cut back, see demos of software to manage that action, review a proposal to manage the effort, and examine incentives to get you to do so.

This opportunity is available to anyone with at least 100 kW (either load or on-site generation) that can be controlled to reduce the system-wide peaks that cost us all a bundle!

Our panelists are:

Peter Blum, Silicon Energy

Leo Cutone, Circadian Information Systems

William Conway, MetroGen LLC

Peter Savio, New York State Energy Research and Development Authority

Our moderator:

Lindsay Audin, President, Energywiz, Inc.

LOCATION: Columbia University's Schapiro Engineering Center (CEPSR), 4th floor auditorium, 530 W. 120th St. (between Broadway and Amsterdam), New York City

Admission: Free for NYEBF members, \$75 for non-members. Non-Members please RSVP to the Forum at (732) 517-0787 or nyebf@aol.com by Jan. 12. Refreshments will be served. Check out the Forum at www.nyebf.org.
