invites you to

Energy Pricing Information: Where Do You Get It, How Do You Use It?

Wednesday, Nov. 17, 2004, 8:30 AM – 11 AM

(sign-in and coffee starts 8:30 AM, seminar runs from 9– 11 AM)

When wholesale energy prices become more volatile, what does that mean to future *retail* energy prices? Budgeting requires sound pricing information, but many of us struggle to find reliable predictions of tomorrow's pricing. Deregulation exposes us to market fluctuations, but does not provide readily available or reliable retail market forecasts.

On November 17, learn about factors affecting oil, gas and electric markets, and how to find and apply energy price forecasting information regarding them.

Presenters:

- Randy Rischar, Executive Editor, IO Energy LLC
- Neil Gamson, Economist, U.S. DOE Energy Information Admin. (EIA)
- Mark Taddeo, Director Of Sales, Amerada Hess
- Richard Card, Account Manager, Constellation NewEnergy

Location: Rockefeller University, Caspary Auditorium, 1230 York Avenue (east side of Manhattan, enter at 66th St.), New York City

Admission: NYECC members attend for free, non-member admission is \$100, payable in advance or at registration. All attendees should pre-register by calling 212-419-1919 by Nov. 12.
